

Problem-Solution Fit

Date	28-june-2026
Team ID	SWUID2026223535
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Develop an AI-powered credit card approval prediction system that helps banks automate applicant screening, reduce manual effort, improve decision accuracy, identify high-risk applicants, and provide customers with instant eligibility predictions through a simple web application.

1. CUSTOMER SEGMENT(S) [CS]  • Banks and Financial Institutions • Credit Analysts • Compliance Officers • Prospective Credit Card Customers	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL]  • Limited budget for advanced screening tools • Dependence on manual process • Limited time and resources • Need for accurate and reliable predictions	5. AVAILABLE SOLUTIONS PROS & CONS [AS]  • Manual Review – Slow, error-prone • Rule-based Systems – Rigid, limited accuracy • Traditional Scoring – Limited factors considered
2. PROBLEMS / PAINS + ITS FREQUENCY [PR]  • Manual screening is slow, time-consuming and error-prone • Inconsistent approval decisions • Difficulty in identifying high-risk applicants • Occurs daily for thousands of applications	9. PROBLEM ROOT / CAUSE [RC]  • Lack of automation • Human bias and inconsistency • Large volume of applications • Complex evaluation process • Incomplete risk assessment	7. BEHAVIOR + ITS INTENSITY [BE]  • Banks seek faster processing and accurate decisions (High) • Analysts rely on manual evaluation (High) • Customers want instant eligibility check (High)
3. TRIGGERS TO ACT [TR]  • High volume of credit card applications • Increasing default risk • Customer dissatisfaction due to rejections and delays • Need for faster and accurate decisions 4. EMOTIONS BEFORE / AFTER [EM]   Before: • Frustration, Uncertainty, Delays, Dissatisfaction After: • Confidence, Satisfaction, Faster decisions, Peace of mind	10. YOUR SOLUTION [SL]  • AI-powered credit card approval prediction system • Uses machine learning models to predict approval or rejection • Automates applicant screening • Identifies high-risk applicants • Provides instant results through a web application	8. CHANNELS OF BEHAVIOR [CH]  ONLINE • Web Application • Bank Portals • Mobile Apps • Digital Communication OFFLINE • Bank Branch Interactions • Customer Service • Printed Communications
