

Solution Architecture

Date	27-06-2026
Team ID	SWUID2026223535
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface where applicants or bank staff enter credit card application details and view approval predictions.	HTML, CSS, JavaScript, Flask
API Gateway	Receives user requests, validates them, and forwards data to the machine learning prediction service.	Flask Routing, REST API
Core Logic / ML Service	Preprocesses input data, loads the trained ML model, and predicts whether the credit card application will be approved or rejected.	Python, Scikit-learn, XGBoost, Pandas, NumPy
Database / Storage	Stores applicant information, trained model files, prediction records, and application data.	SQLite / PostgreSQL, Pickle (.pkl), IBM Cloud Storage
